When age becomes only a number...

We are pleased to introduce our new facial aesthetic range that compliments our dental and orthodontic services.

Botox® - if you are planning to improve your frown lines, forehead wrinkles, then this treatment might be right for you.

Restylane® - if you'd like to enhance your looks with fuller lips or softer facial lines this treatment can easily achieve this. Various products of this family can help you replenish the lost volume, hydrate and moisturize from within, improving skin tone and elasticity.

Sculptra™—if you'd rather gradually stimulate the body's own collagen to smooth lines and wrinkles then this procedure is definitely for you.

TCA Skin Peel—if you'd like to focus on the lines under your eyes and around your mouth, this treatment is for you. Wrinkles caused by sun damage, ageing and hereditary factors can often be reduced with TCA skin peel.
